Education

Jalpaiguri Government Engineering College

Bachelor of Technology – Information Technology (YGPA: 7.26)

Jalpaiguri, India

Sep 2023 – Jul 2027

Skills

Programming Languages C, C++, Java, JavaScript, TypeScript, Python, SQL, Bash(Shell), HTML, CSS

Frameworks & Libraries React.js, Node.js, Express.js, Tailwind CSS

Tools & Platforms Git, GitHub, VS Code, Google Colab, MySQL, MongoDB, Linux

Coursework Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Software Engineering

Soft Skills Leadership, Communication, Teamwork, Time Management, Presentation Skills

Projects

• MERN Authentication System

• MongoDB • Express.js • React.js • Node.js • JWT • Nodemailer

- Developed a full-stack authentication system using the MERN stack with secure user registration, login, email verification, and password recovery.
- Implemented JWT-based authentication, bcrypt password hashing, protected REST APIs, and HTTP-only cookie-based session management.
- Integrated OTP-based email verification and password reset using Nodemailer with SMTP for secure account activation and recovery.
- Built a responsive React frontend with protected routing, seamless Express.js backend integration, and MongoDB for efficient user management.

• Railway Reservation System

• HTML • CSS • JavaScript • (ES6) • jsPDF • QRCode.js

- Developed a railway reservation system using HTML, CSS, JavaScript, and jsPDF for train search, ticket booking, and passenger details management.
- Implemented fare calculation, seat allocation, journey validation, and generated downloadable e-tickets with unique PNR and QR codes.
- Designed a responsive user interface with client-side form validation and error handling to improve booking accuracy and user experience.

• MERN URL Shortener

• React.js • Node.js • Express.js • MongoDB • Tailwind CSS

- Developed a full-stack URL shortener using React.js, Node.js, Express.js, and MongoDB to generate unique short links with automatic redirection.
- Built RESTful APIs for URL creation, storage, retrieval, and secure client-server communication with input validation and error handling.
- Designed a responsive React interface with copy-to-clipboard functionality and instant short URL generation for an improved user experience.

Coding Profiles

• LeetCode

• Codeforces

• CodeChef

• GeeksforGeeks

Positions of Responsibility

◦ Mentor – Divide & Conquer, Coder's Club, JGEC

◦ Teacher – Jyoti Night School, JGEC
